LECTURE NO:- 07

→ Four Pillars of Venture :- i) Innovation ii) Risk-taking iii) Value Creation
iv) Resource Management.

LECTURE :- NO:- 06

→ 6 - Lenses of Innovation:-

i) Microscope (customer Pain):-

→ Simple Meaning:- Look very closely at the problems your customers have right now

→ When to use it: Use when you want to create a new product or service that people will definitely want because it fixes something that annoys them

ii) Binoculars (Observation).

→ Watch how people actually behave instead of just asking them what they want.

→ Use this when you are stuck or want fresh ideas. It helps you spot hidden needs that people don't talk about.

iii) Telescope (Future - Backward).

→ Imagine what the world will look like in the future. Think about what people will need then, and figure out what you need to build today to get ready.

→ Use this for long-term planning or when you want to be ahead of the competition by predicting where the market is going.

iv) Mirror (Existing Assets):-

→ Look inside your own company. What are you already good at?

→ Use it when you need to grow quickly without spending a lot of money on new things. It's about using what you already own to enter new markets.

5) PRISM (structured Ideation)

↳ Simple Meaning:-

Take an existing product or idea and force Yourself to change it. Combine it with something else, turn it around.

↳ Use this when you want to improve an existing product by looking at it from different angles.

6) Blueprint :- (Intrapreneurship):-

↳ Create a plan for Innovation inside a big company.

When to use it:

Use this when you work in a large organization and need to build new products without the slow rules of main company slowing you down.

LECTURE NO:- 05

Idea Generation & Opportunity Recognition:-

Main Idea:- Every business starts because someone has a problem. Your job as an Entrepreneur is to find that problem and build a solution for it.

① Problem Identification (The starting point):-

The Rule :- Always starts with the problem first, not the solution.

Where to look?

- i) Issues in a specific industry
- ii) Inefficiencies at work

Key point:- Best problem is the one that affect alot of people

② Opportunity Recognition (Seeing the Business) :-

Definition:- Seeing a chance to make money where other people just see a hassle.

The Checklist for a Good Opportunity.

- ↳ Solves a real problem
- ↳ It can grow big (Scalable)
- ↳ It can last long-term (Sustainable)
- ↳ You have the skill to do it.

③ Gap Analysis (Finding the missing Piece)

Definition:- Looking at where we are now vs where we want to be & finding what's missing in between.

Example:- Fast food is everywhere; but healthy food is hard to find quickly. (The "healthy fast food" gap).

④ Problem-Solution Fit Test (Check your work)

Definition:- Make sure your solution actually fixes the problems for real people.

⑤ Barringer's Opportunity Model (The 4 checks) (ADTF)

① Attractiveness: Is the market big enough? will people pay?

② Durability:- Will people still want this next year?

③ Timeliness:- Is it the right time for this idea? (Too Early or Too late fail).

④ Feasibility:- Can you actually build this?

⑥ TREND Model:-

Use this to see what is happening in the world that makes your idea a good bet.

- ① Technology (e.g. AI, IoT, Cloud Computing)
- ② Regulation (New laws that create needs)
- ③ Economy (Are people spending?)
- ④ Needs (what are people really needing for)
- ⑤ Demographics: (Changes in age, location, or population)

(LECTURE:- No:-04)

↳ Why Engineers make great Entrepreneurs

Simple Reason:- Engineers are trained to build things and solve problem logically

- ① Strong Analytical thinking :- Breaking big problems into small parts.
- ② Build MVPs quickly
- ③ Automation & Scalability
- ④ Low dependency

Entrepreneur:-

- Starts their own business
- Takes all the risks; keeps all the profit

Intrapreneur:-

- Works inside a big company like an Entrepreneur
- Uses company money to build new thing for them

LECTURE :- NO :- 03

1) Innovative Entrepreneurs

Who they are :- They create; They bring new ideas, products to the world.

What they do :- They disrupt industries and create markets that didn't exist before.

2) Imitative Entrepreneurs :-

Who they are :- The adapters. They look at successful product or business and copy it; usually making it a little better or cheaper.

What they do :- They enter market that already exists.

3) Fabian Entrepreneurs:

Who they are :- They are skeptical of change and won't try something new until it has been proven successful by others.

What they do :- They wait & watch. They only adopt new ideas when they are sure there is no risk.

4) Drone Entrepreneurs: They refuse to change or adopt new methods, even when their current way of doing things is failing.

5) Social Entrepreneurs :- Solve social problem, not just to make money.

6) Serial Entrepreneurs :- They love the thrill of launching new business.

7) Lifestyle Entrepreneurs :- They build a business around their hobby or dream lifestyle.
